

## **TYPES OF ADMISSION TO GRADUATE PROGRAMS**

There are two types of admission to graduate programs:

1- **Unconditional Acceptance (Full):**

Granted to applicants who are directly admitted to their academic major as they meet all the admission requirements set by the program and university they are applying to.

2- **Conditional Acceptance:**

Generally offered to academically qualified international applicants who do not meet one or more of the admission's requirements, such as not having the English proficiency score or the GRE or GMAT scores.

Admission can also be conditional until the student obtains the required score during his/her first semester in the university, this is sometimes referred to Admission with Permission to Continue.

Applicants lacking some pre-requisite courses, or did not score enough in essential gateway courses during their undergraduate studies, may be admitted with deficiencies and will be required to take additional credits in the areas of deficiency in addition to the course work ordinarily required in the graduate program so they can meet the full admissions requirement.
